Summary

Security Analyst with hands-on expertise in Vulnerability Assessment and Penetration Testing across network, web, API, and mobile applications. Experienced in identifying high-impact vulnerabilities, performing black-box and grey-box assessments, and conducting practical offensive security testing. Strong proficiency in web application security, API testing, network security, and privilege escalation techniques, with experience developing internal automation scripts to improve security workflows. Recognized for delivering clear, actionable security reports, effectively communicating risks, and contributing to improved security posture across real-world environments, while continuously expanding skills in advanced and emerging security domains.

Work Experiences

Fetlla LLP

Calicut, India

JUNIOR PENETRATION TESTER

Mar. 2025 – Sep. 2025

- Performed hands-on penetration testing and vulnerability assessments with a specialization in **web and Android application security**.
- Conducted comprehensive security assessments to identify, validate, and document vulnerabilities in accordance with industry standards and best practices.
- Delivered clear, actionable findings with proof-of-concept demonstrations to support effective remediation and improve application security posture.
- Collaborated closely with internal teams to strengthen secure development practices and ensure secure, reliable user experiences for clients.

Independent / Personal Projects

Remote / Online

BUG BOUNTY HUNTER & SECURITY RESEARCHER

Apr. 2023 – Present

- Actively participate in bug bounty programs across **web and mobile applications**, identifying and responsibly disclosing vulnerabilities to platforms like HackerOne and Bugcrowd.
- Found and reported high-impact security issues, applying practical offensive security techniques and producing clear, actionable reports.
- Developed custom tools and automation scripts to streamline bug hunting workflows and accelerate vulnerability discovery.
- Refined manual testing methodologies, including reconnaissance, authentication bypasses, and API security testing, leveraging OWASP standards and industry best practices.
- Continuously expand knowledge in emerging domains including **Web3 security**, smart contracts, and decentralized applications.

Core Skills

Penetration Testing	Web, API, Mobile, Network, & Wireless Security
Recon & Enumeration	OSINT, Subdomain Enumeration, Service Discovery, Tech Fingerprinting
Network Security	Internal/External assessments, service enumeration, vulnerability exploitation & validation
Web Security	CMS Exploitation, OWASP Top 10, Authentication/Session flaws, Business Logic vulnerabilities
Security Tools	Burp Suite, Metasploit, Nuclei, Dirsearch, Aircrack-ng, MobSF, OpenVAS, Nessus
Reporting	CVSS scoring, Technical documentation, Risk-based recommendations

Certifications & Achievements

2025	Recon Badge , Hands-on Web Application Reconnaissance Certification	PentesterLab
2024	CAP , Certified AppSec Practitioner	The SecOps Group
2023	Practical Ethical Hacking , Hands-on Penetration Testing & Red Team Fundamentals	TCM Security
2022	CPT , Certified Penetration Tester	RedTeam Academy

Projects

VaultSweeper – Automated Secret Exposure Scanner (Python)

(PERSONAL PROJECT)

- Developed an automated security scanner to detect **verified exposed secrets** in GitHub repositories using **TruffleHog v3**.
- Integrated the **GitHub API** to support large-scale repository enumeration with concurrent scanning for improved performance.
- Implemented **real-time Discord webhook alerts** with structured JSON payloads for efficient incident review and triage.
- Added detailed logging, timestamped output files, and automated reporting to enable continuous monitoring and auditing.
