Summary

Security Analyst with hands-on expertise in Vulnerability Assessment and Penetration Testing across network, web, API, and mobile applications. Experienced in identifying high-impact vulnerabilities, performing black-box and grey-box assessments, and conducting practical offensive security testing. Strong proficiency in web application security, API testing, network security, and privilege escalation techniques, with experience developing internal automation scripts to improve security workflows. Recognized for delivering clear, actionable security reports, effectively communicating risks, and contributing to improved security posture across real-world environments, while continuously expanding skills in advanced and emerging security domains.

Work Experiences

BUG BOUNTY HUNTER & SECURITY RESEARCHER, *Independent / Personal Projects*

04/2023 – Present

Remote/Online

- Actively participate in bug bounty programs across web and mobile applications, identifying and responsibly disclosing vulnerabilities to platforms like HackerOne and Bugcrowd.
- Found and reported high-impact security issues, applying practical offensive security techniques and producing clear, actionable reports.
- Developed custom tools and automation scripts to streamline bug hunting workflows and accelerate vulnerability discovery.
- Refined manual testing methodologies, including reconnaissance, authentication bypasses, and API security testing, leveraging OWASP standards and industry best practices.
- Continuously expand knowledge in emerging domains including Web3 security, smart contracts, and decentralized applications.

JUNIOR PENETRATION TESTER, *Fetlla LLP*

03/2025 – 09/2025

Calicut, India

- Performed hands-on penetration testing and vulnerability assessments with a specialization in web and Android application security.
- Conducted comprehensive security assessments to identify, validate, and document vulnerabilities in accordance with industry standards and best practices.
- Delivered clear, actionable findings with proof-of-concept demonstrations to support effective remediation and improve application security posture.
- Collaborated closely with internal teams to strengthen secure development practices and ensure secure, reliable user experiences for clients.

Educations.

BA ENGLISH HONOURS, *Indira Gandhi National Open University (IGNOU)*

2021 – 2025

Distance Education

Core Skills

Penetration Testing

Web, API, Mobile, Network, & Wireless Security

Network Security

Internal/External assessments, service enumeration, vulnerability exploitation & validation

Security Tools

Burp Suite, Metasploit, Nuclei, Dirscarch, Aircrack ng, MobSF, OpenVAS, Nessus

Recon & Enumeration

OSINT, Subdomain Enumeration, Service Discovery, Tech Fingerprinting

Web Security

CMS Exploitation, OWASP Top 10, Authentication/Session flaws, Business Logic vulnerabilities

Reporting

CVSS scoring, Technical documentation, Risk-based recommendations

Languages.

Malayalam

Native

English

Professional Proficiency

Projects

GitHub Secret Exposure Scanner, *Personal Project* | Python, TruffleHog, GitHub API |

- Built automated secret scanning tool targeting GitHub organizations, repositories, and developer accounts using TruffleHog + GitHub REST API.
- Implemented session persistence, graceful interrupts, and multi-target batch scanning for large-scale reconnaissance workflows
- Implemented real time Discord webhook alerts with structured JSON payloads for efficient incident review and triage.
- Applied tool in bug bounty context discovered exposed API keys, cloud credentials, and tokens in real world targets

Certifications & Achievements

Recon Badge, Hands-on Web Application Reconnaissance Certification,
PentesterLab

01/12/2024

CAP, Certified AppSec Practitioner, *The SecOps Group*

01/12/2023

Practical Ethical Hacking, Hands-on Penetration Testing & Red Team Fundamentals, *TCM Security*

01/12/2022

CPT, Certified Penetration Tester, *Red Team Academy*

01/12/2021
